

Recently the FCC has applied pressure to make changes to the radio braodcasts I listen to daily. I vehemently disagree with the cource you've taken to make all radio programs milktoast and uninteresting. Now it would seem that you're going to impose changes on a service I gladly pay for to get the programing you're chasing off the public airwaves. I would appreciate it if you would make better use of my tax dollars and focus on more important issues.
